

01-Introduction

Montag, 12. Februar 2024 09:02

Evolution of MiVoice MX-ONE and it's administration tools

From premise based basic telephony to
@SaaS.Value-Added.Services

--> Provisioning Manager (HTTPS) - Graphical Interface for beginners and end users with small amount of programming (click, click, ...)

Considered requirements for next generation tool

- 1) Time is money
 - a. Outsource as much as you can -> Let the end customer do the job
 - b. Quick programming is afforded -> Generate and execute SSH-commands
- 2) Easiness
 - a. Based on user friendly & well known interface -> Excel spreadsheet
 - b. Online help as embedded tool-tips -> No additional User Guide necessary
- 3) International
 - a. Multilingual user interface -> Actually available in English, German, French, Italian & Spanish
 - b. Further languages on demand
- 4) Compatibility
 - a. Support MiVoice MX-ONE Releases -> actually from 5.0 to 7.4
 - i. Embedded release notes document the single version steps
 - b. Compatibility from Microsoft Office 2007 up to Office 365
 - i. 32- & 64-Bit OS & Office

Concept of Next Generation Tool

- 1) Manual acquisition of customer data
- 2) Import data, based on backup of MiVoice MX-ONE
- 3) Export & Apply SSH commands to the MiVoice MX-ONE
- 4) Generate files for additional applications
