

03-The Add-ins Menu

Montag, 12. Februar 2024 12:16

Once license has been entered, the Add-ins menu shows up with main menus **Settings** and **MiVoice MX-ONE**

Integration of SSH allows administration of MiVoice MX-ONE directly from Excel

If required, generic extensions may be changed or TDM extensions (a/b, Digi) may be migrated to generic extensions

Once acquisition of customer data has been done, it is also possible to export data for multiple purposes

Import of MiVoice MX-ONE data is also possible based on PC-Regen data (Source & Target)
